

Risk assessment at the national level

Suggested questionnaire to help assess the risk at the national level

1. Are there specific programmes for managing stressors in undergraduate dental students?

2. Are specific coping techniques taught to dental students?

3. What resources and services are available for dentists on the national level?

4. Are there specific studies on the national or regional level to determine what influences the health and well-being of dentists and members of the dental team?

Date of assessment: _____
